

The world looks different through their eyes

Sometimes it's scary and confusing

ANY CHILD
ANY AGE

Babies and small children need to feel safe and nurtured, because a child who often feels alone or neglected, or a toddler who's always scared, may result in childhood trauma—trauma that can have life-long effects.

Learn to look through their eyes—at what they see, hear and feel is happening in their tiny world—and listen with your heart.

Learn about the symptoms, causes and what you can do at LookThroughTheirEyes.org

El mundo se ve diferente a través de sus ojos

A veces es inquietante y alarmante

cualquier niño
cualquier edad

Los bebés y los niños pequeños necesitan sentirse seguros y bien cuidados, porque un niño que a menudo se siente solo, o esta descuidado, o un niño pre-escolar que siempre está asustado, puede desarrollar trauma infantil. Un trauma que podría tener efectos de por vida.

Aprenda a mirar a través de sus ojos—a ver lo que ellos ven, oyen y sienten que está pasando en su pequeño mundo—y a escuchar con tu corazón.

Infórmese acerca de los síntomas, causas y de lo que puede hacer.
